To Whom It May Concern

Anirban Ghosh is a final year Integrated M.Sc. Student in Statistics from Kalyani University. He has done one year group master project with me during the period of September 2023 to September 2024. His thesis title was "Does the Variance of Daily Rainfall During the Monsoon in West Bengal Change: An Evidence from a Statistical Hypothesis Testing". In this regard, he analyzed the district-level daily rainfall data over a period of 100 years, received from the West Bengal Pollution Control Board. He analyzed it in R software and prepared a report. He is a very hard-working and sincere student. Overall, his performance is more than satisfactory. For any further information, feel free to contact me.

Sincerely yours,

Raju Maiti
